

## Juniper Cup MapRun Final details (11/12-13, 2022)

### Categories:

There will be two MapRun courses during the Juniper Open Cup, both days:

**MapRun Open category** – medium difficulty - line course showing the current position (4 km)

**Open A category** – supported with Garmin watch next to SI card

Courses will be open on the given event day, we will share a PIN code to open them.

*In case of bad weather, as you would have limited use of the phone, they will be transformed into a normal, Open course with paper map and SI card.*

### Description of the course types:

**Open A category** (supported with Garmin watch)

The course is the same as the Open A technical course. We make the course available for download to the Garmin watch with the MapRunG application. Competitors will receive the download code by email the day before the race. During the event, a printed map is required, and SI card usage for the common results list.

**MapRun Open category** linear course: shows the current position throughout.

To do this, you need a smartphone and the MapRun6 application on it. Runners will also receive a map, but it is also worth following the completion on the phone to punch points, measure time, use position markers. **Compass is also required!**

**There is code and physical marking on the points**, the punching of the point is confirmed by the phone. If that fails, but we're sure we've caught it, move on. The result can be corrected afterwards based on the track.

There is a short test course around the event centre where everyone can try out the MapRun6 app on their phone. We also help with the application download, its use is shown.

More details before the competition in our Facebook group: [MapRunners.hu](#) | [Facebook](#)

### Results:

The results can be followed online on the MapRun website by opening the shared direct links (including the qr code) in the competition centre.

Of course, completion is also accepted by post-processing based on a track recorded on a smartwatch or other device.

**Prizes:**

Results for **MapRun Open category** will be announced the week after the competition, online, best runners are rewarded.

*Welcome for all MapRun fans to have a challenging run, exchange of experience, brainstorming - even for a day!*

*Tibor Erdélyi*

*Gabriella Fazekas*
